

Phạm Thanh Phong

Junior .Net Developer

0787868595

ptp150202@gmail.com

Go Vap, Ho Chi Minh City

OBJECTIVE

In the short term, I aim to strengthen my backend development skills, especially in .NET Core and database design, while gaining experience through real-world projects and working in a professional team.

In the long term, I aspire to become a senior backend developer or technical lead, capable of designing scalable system architectures and contributing to building high-quality software products.

WORK EXPERIENCE

Lac Viet Computing Corporation

11/3/2024 - Now

BACK END (.NET CORE) + FRONT END (ANGULAR) DEVELOPER

+ Role Backend:

- Worked with microservices architecture.
- Developed APIs based on provided documentation.
- Wrote stored procedures, functions, and views using MSSQL and PostgreSQL.
- Optimized performance for stored procedures and functions.
- Created reports using Report Builder.

+ Role Frontend:

- Developed and maintained dynamic, responsive user interfaces using Angular.
- Built and maintained mobile applications using Ionic.
- Implement UI based on Figma designs using the company's core framework.
- Develop and integrate APIs while ensuring smooth communication between frontend and backend.

SKILLS

Backend

ASP.NET Core (MVC, Web API), Entity Framework, RESTful API, JWT, OAuth2

Frontend

Angular 16+, TypeScript, JavaScript, Ionic, HTML, CSS

Database

SQL Server, PostgreSQL, Stored Procedures, Functions, Views

Tools/ Others

Git, Github, Swagger, Postman, Agile/ Scrum, Design Pattern, SOLID Principles

PROJECTS

Website introducing Real Estate

10/2023 - 12/2023

Source Code: [Here](#)

Team size: 2

Supermarket Management

11/2023 - 01/2024

Source Code: [Here](#)

Team size: 1

BACKEND AND FRONTEND

Developed a real estate listing platform with features including JWT-based authentication and authorization, CRUD operations for listings and configurations, advanced search and filtering, PayPal integration for account deposits, listing management with repost functionality, statistical reports by time range, and user profile management.

.NET Core Web API 6, Angular 17, SQL Server, JWT, Entity Framework, Paypal Gateway, RESTful API

FULLSTACK

Built an e-commerce platform with OAuth-based authentication and authorization, product search and filtering, product detail views, add-to-cart functionality, purchase history and invoice viewing, order search by phone number, statistical reporting, user and order management, order status updates, and CRUD operations for products and categories.

.NET Core MVC, SQL Server, OAuth2, Entity Framework

EDUCATION

2020 - 2024

SOFTWARE TECHNOLOGY

University of Information Technology (UIT)

CERTIFICATIONS

2024

TOEIC 500
